

# MEC Requirements

**Approved MEC Models:** All MEC Aerial Work Platforms are approved.

**eksoaerial System Weight:** 34.8 lbs. (15.7 kg)

**ZeroG Arm Maximum Payload Weight (tool and tool holder):** 36.0 lbs. (16.0 kg)

The weight of the eksoaerial System including the weight of the payload should be subtracted from the platform rated capacity.

Any downward reaction force from the tool that the attachment supports, such as drilling in an upward direction, shall be subtracted from the platform rated capacity.

The weight of the eksoaerial System including the weight of the payload should be subtracted from the platform rated capacity.

Please read all documentation before installing and using the eksoaerial System.

The eksoaerial System is an innovative solution to a safety and worker fatigue problem; as such we are pleased to authorize its use on MEC Aerial Work Platforms.
